## Full Stack Software Engineer

New York, NY 917-227-7920

Fullstack software developer proficient in Javascript, React, and Node.js, with experience building REST APIs using Express and PostgreSQL. Bringing a diverse background encompassing real estate development, startup internships, and an intensive coding bootcamp. Eager to apply my enthusiasm for technology, strong work ethic, and experience in multiple industries to make a meaningful impact within a dynamic software development team.

## Work Experience

### **Swipecast**, New York, NY — Full-stack Engineer Intern

September 2022- Present

- Developed and optimized client-facing features and enhancements across the user experience, specifically in chat and matchmaking functionality
- Collaborated with executive leadership, including the CEO and engineering team, to establish project scope, deliverables, and timelines
- Identified and debugged software, enhancing chat functionality and user experience

Technologies: JavaScript, React, Ruby on Rails, React Native

### **Attention**, New York, NY — Engineer Intern

April 2022 - September 2022

- Acquired clients for an AI-focused company by leveraging technical expertise and exceptional communication skills, leading to increased customer acquisition
- Worked on the initial product live-streaming stack
- Helped implement an end-to-end transcription and NLP service for iterating with initial design partners
- Excelled in a hybrid role, encompassing software development, business development, and sales

Technologies: Go, Typescript

### **Prime Manhattan Development**, New York, NY — Co-Founder & Developer

June 2016 - September 2021

- Led the strategic acquisition of two properties through in-depth market analysis and research, resulting in profitable investments
- Managed \$25 million worth of construction projects, emphasizing cost efficiency and timely completion
- Coordinated with contractors and architects to optimize cost and timeline performance using strong project management skills

## Projects

### **Merch.AI** — Sole Developer

December 2022

Developed a mobile app that generates unique posters of user's favorite songs using OpenAI and Spotify APIs

- Designed, developed, and launched web app using Node.js, Express.js, and React.js
- Integrated and tested Spotify API for user song selection and OpenAI API for personalized art generation
- Created a gallery page for viewing, and downloading art, and integrated Stripe API for purchasing prints

Technologies: JavaScript, React, Node.js, Express

### **Duet** — Team Developer

December 2022

Developed a social app connecting users based on mutual interest in events with a team of 3 other engineers

- Served as project manager, ensuring effective communication and timely completion of tasks
- Developed feed functionality and integrated Ticketmaster and Google Maps APIs
- Utilized Material UI for modern, responsive design and implemented the backend with Node.js, Express.js, and REST APIs

Technologies: JavaScript, React, Node.js, Express, MUI

## Skills & Technologies

Javascript  
Typescript  
Node.js  
React  
React Native  
Redux  
Ruby  
Ruby on Rails  
jQuery  
SQL, PostgreSQL  
Express  
Git, GitHub  
HTML5, CSS3  
Sass, SCSS

## Education

### **Fullstack Academy**

Flex Immersive  
Software  
Engineering  
Bootcamp  
2022

## Certificates

### **Harvard CS50**

Javascript  
2022

### **Udemy Algorithms & Data Structures**

2023
